## What's New In?

Publish DWF files directly to the cloud. After adding your DWF model to the cloud, customers can access your DWF file from any PC, iPhone or iPad by clicking the Publish to Cloud button. (video: 3:20 min.) Add hyperlinks to your DWF models. With the Link DWF (LT, LC, etc.) command, you can link your DWF files to a website, file path, or content in the cloud. Linking can be useful for linking a DWF file to a website for a walk-through, which is a requirement for many government and insurance applications. (video: 1:15 min.) Create hundreds of new commands for importing different file types into your drawings. AutoCAD now provides nearly 50 new commands for importing files and inserting objects from the Internet and cloud services. With these new commands, you can automatically import: Word, PDF, CSV, XLS, CSV, and XML. (video: 3:32 min.) Simplified startup: AutoCAD now starts faster by importing commonly used options from the menu bar. You can specify the desired drawing options in the Options dialog (Window menu) and continue working in the drawing. (video: 1:29 min.) Undo, Redo and Block Reference: Create two-dimensional or three-dimensional blocks on the fly with the Block Reference command. First, you can enter the command to quickly create a block (or selection of blocks). Then, you can draw the block or select objects and automatically snap to it. (video: 1:50 min.) New drawing and plot toolbars: The new drawing toolbar and plot toolbar are more compact and customizable. A button to quickly turn on or off the dynamic changes to your drawing is now part of the toolbar. (video: 3:15 min.) Unified Copy-Paste and Object-Hide commands: The Copy command in both object and graphic context now copies and pastes using the Copied Items property. (video: 1:59 min.) Copy and Paste for 3D Objects: With the Copy command in 3D object context, you can copy and paste 3D objects without needing to worry about the origin point or orientation. (video: 1:48 min.) Copy and Paste Selection, Layer and Nested Objects: You can copy and paste a selection or layer in any direction. With the
