Do you like to share your files? Do you like to share files between hard drives and networks? Do you want to add a back up server to your NAS? Do you like to send and receive files in an easy way? If you have one or more questions like those, then the Cloud Storage solution that you need is: **FILEXPRESS!** FILEXPRESS allows you to share files between network drives, hard drives, NAS devices, smartphones, tablets and cloud services. Filexpress is a very easy-to-use file sharing software that is compatible with Windows, Mac, Android, IOS and Linux devices. It is a cross-platform sharing software. You can share files between all kinds of devices and network

services like: NAS devices, Windows PC, Mac, Android, IOS, Linux, Linux Servers, iOS Devices, Smart Phones, Tablets, NAS Devices and more. With Filexpress you will be able to create, send, receive and access files in a safe and secure way. Filexpress can be used as the primary solution for file sharing between devices in a network. Using Filexpress you can easily share your files on the network and perform online file sharing between your devices. Filexpress shares your files easily between your different devices and network storage. • You can share your files directly from your computer, smartphone, or tablet. • You can save your files in the cloud. • You can upload your files to an online drive. • You can access your files from anywhere. • You can access your

files from your Dropbox, Google Drive, OneDrive, Box.com, SkyDrive, Apple iCloud, and Microsoft OneDrive accounts.

- You can share files with a friend, family member, or any member of your family.
- You can create an online drive, which allows you to share your files with anyone with an internet connection.
- You can create a public drive or private drive that can be accessed by anyone with an internet connection.
- You can automatically backup your files or manually backup your files.
- You can perform an automatic backup or perform a manual backup to your cloud service.
- You can schedule automatic backups or manual backups to your cloud service.
- You can configure file sharing settings and set file sharing permissions and

sharing options. • You can set network settings and create network shares. • You can share files to any device connected to your home network, regardless of

What's New in the?

Weeny Free Duplicate Finder is a small utility that helps you scan your computer for duplicate files and remove them. Its lightweight layout makes it easy for you to use and learn to configure its parameters.

Barrett C. - 10/22/2010 Works fine but keeps on hanging This program does what it is supposed to do but keeps on hanging while I'm trying to scan the disk for duplicates. 0 out of 1 people found this review helpful. Was this review helpful?

Weeny Free Duplicate Finder 3.4.0 Build 10422 Barrett C. - 10/20/2010 Works well and does the job. The free duplicate finder program does a good job of scanning the disk for duplicates. It even lets me save the files to another location if I want to. The free version is enough for most, but is not good if you have very large files. I recommend the program, but it would be nice if they also had a free program that worked well with larger files. 0 out of 1 people found this review helpful. Was this review helpful? Geoffrey - 10/11/2010 Easy to use, easy to learn Works well and does the job. The free duplicate finder program does a good job of scanning the disk for duplicates. It even lets me save the files to another location if I want to. The free

version is enough for most, but is not good if you have very large files. I recommend the program, but it would be nice if they also had a free program that worked well with larger files. 0 out of 1 people found this review helpful. Was this review helpful?
