A new attack system makes it easier for players to create chance by using the ball at the right time, in the right place and while being supported by other players. The new approach is enabled by "HyperMotion Technology." "We want the player to feel as if they were actually on the pitch – working with teammates and opponents and making those vital decisions for the team," said Marc Explo, Technical Director. The PlayStation 4 version includes the following HyperMotion features: FIFA 22 HyperMotion Technology Algorithmic Player Behaviour with Improved Decision Making Co-op & Online Modes with New AI New Player Character Animations New Teammate Characters Online Career Mode Many new animations are being deployed, including new animations and improvements to the Real Player Motion (RPM) engine and animations used by the NextGEN Player. As part of the RPM engine, players that have sustained injuries are also being treated to subtle improvements to player character animations, particularly in-stance/weight changes, and more than 40 new animations have been added to the roster. New pre-set animations are also being deployed, including new running animations, and new animations for non-movement-related activities such as movement away from an opponent or charging. The game also features a new co-op team AI, which allows you to take control of a player-controlled teammate to help you out during gameplay by distracting an opponent or creating a scoring opportunity. Online modes such as online Co-op and online online 1-on-1 mode will also have a new AI designed to help you find your form and work as a team. Complete your FIFA Ultimate Team with new fantasy items, including new shoes for Ronaldo and Gareth Bale. Features Key:

- New "HyperMotion Technology" makes FIFA 22 more realistic with over 200 new goals and over 100 new moves. The ball moves faster, dribbling feels more realistic and actions stay on-point longer. Enhanced playmaker saves, reactive pass direction, and matched direction mean that there are more moving parts to keep in mind when making a pass.
- Innovative "New Generation Player Physics" delivers enhanced movement and unpredictability, as well as more player personality that players respond differently to the ball moving to each of their feet and an advanced new A.I. system called "Fluid Intelligence" that better predicts what your opponent will do.
- New tactics-based LIVE CAMERAS allow for your gameplay to be more authentic by flipping the camera angle whenever the design of the stadium allows for that. For example, press the ball on the wing with the defender in front of you, push the ball towards the corner flag instead of the goal post to put your winger in space. Or, if you want to give your goalkeeper some screen time, carefully move the ball to the side so the goalie can read the pass.
- New to the series, the a new set of Pre Season Games allows for a worldwide tournament and celebration of full clubs in the International Series. Play on a brand new tour with titles like World Cup, the Supporters' Championship, and the Erudito Cup, along with new venues and in-depth customisation options. The new version of the offline Tournament Mode, the International Series, also provides a new player tournament including the world cup.
- Enhanced player connection in Up to 4v4 Friendlies unlocks new ways to play and keeps the official 4v4 matches in FIFA one of the deepest and most realistic soccer games on the market.
- Four vibrant and varied game modes including: Campaign, LIVE TOURNAMENTS, CLUB CONNECTIONS and ROSTER DEVELOPMENT, available in MULTIPLAYER.
- Play as your favourite player or set a goal for the next popular FIFA icon. Choose what they look like and what their run mentality and pass accuracy is. Change the colours and kits for your club and your favourite players.

Edit: UPDATED 08/01/19: FIFA 20 launches today and will be available in stores and online. Here at EA SPORTS™ we're incredibly proud of how vibrant, fun and authentic FIFA has always been. But we also believe that FIFA needs to change with the times and needs to evolve to challenge players and the new generation of football fans. This is why our quest continues in an effort to bring football into the 21st century. FIFA needed change For years we've been building from the ground up, striving to provide players with the best all-round experience in real football. We've nurtured our game to be authentic. We've made it fun. We've made it popular. But from the moment we launched FIFA in September 2005, we knew we were at a major crossroads. As the biggest and most popular videogame brand in the world, we knew we could not afford to stand still. We needed to seek inspiration from across the wider industry. We needed to pay attention to what was happening in sports games and sports TV. And we needed to listen to our community, to its feedback, its ideas, and its love. That's when we started work on FIFA 19. This year we set out to create the best soccer experience in the world. And there is no doubt: we got it right. We wanted to revolutionise the gameplay and challenge players in new ways. We wanted to reinvent the experience, from creating a fluid, authentic and dynamic first touch AI to realising how a football pitch really feels. We wanted to ensure that we had a game that reflected the real-life magic and complexity of modern football. Bringing all these things together was a huge challenge. And, because of this, it is a very exciting time for FIFA. Because on the 25th of August we will unleash the biggest year in the history of FIFA—one that will continue to test and inspire the community. FIFA 20 features We're excited about FIFA 20 because it continues to innovate and deliver on all our core objectives. In this game, we made players more creative and more tactical, more authentic and more in control. We wanted to take all of the best elements of FIFA 19 and refine them. We wanted to strip back and add layers. We wanted to layer the complexity that players love to see. We want to get fans talking. The game bc9d6d6d4a

What's new:

- **HyperMotion Technology - Add more immersion and authenticity to football matches with this immersive technology that unlocks complete levels of player action using motion capture data from a real-life football match in motion capture suits.**
- **Ultimate Team Pro - Select from over 100 FUT cards and more than 500 team kits to build the greatest football team ever. And for the first time in FIFA, make millions of transfers using the new FUT Draft on the pitch.**

First introduced in FIFA 19, Ultimate Team Pro allows players to draft their attacking and defensive lineups using the new FUT Draft table in FIFA 22. Using new FUT Draft functionality, players' cards from FIFA 21 will no longer require any specific cards from a FIFA Ultimate Team account to create a team, resulting in more opportunity to get more attractive cards that can be inserted into the best-ever Ultimate Team team.

What's new in career mode:

- **Pro Player Career - Gamers can now have it all: manage their club and their player career simultaneously. With more flair options, new player contracts, and direct club instructions, you can now monitor the evolution of your players' skill levels and shape them into world class stars, free from the constraints of being limited to only your own player career.**
- **Club Ownership System - Shift football's development from grassroots to the top, and prove that the bank balance doesn't always define the champion. The 360-odd clubs are now supported by a full range of unique add-ons, including stadium improvement loans, player loaning, transfer saves and player progression enhancements. Club co-ownership allows players to keep both their base salary and add-on wages, and run their team alongside a business, removing club management as a barrier to first-time players wanting to throw themselves into the hot-seat.**

Need a taste of what you'll experience when FIFA 22 launches later this year? FIFA is an annual video game franchise published by Electronic Arts that features a yearly roster of prominent players and teams that aspiring players and fans follow. The game also includes a suite of popular annual modes, such as 1v1 Player Duel, FIFA Ultimate Team, Seasons, and more. The series has more than 100 million players worldwide and sells more than 160 million units every year. The story in FIFA starts when World Cup hosts in Brazil and the 50th FIFA World Cup trophy are stolen and left to be found in a locked room after the greatest final game ever on the planet, the 2014 World Cup final, where Germany beat Argentina to win the FIFA World Cup. The stolen football was later put back into circulation and returned to the trophy room. As the hunt for the football continues, the character of each player will have their own unique story arc, affecting their future in the game. FIFA is a fast-paced football action game, allowing players to pick up where the final of the World Cup left off as FIFA 11 comes to life. FIFA 21 will also bring a new story and graphics that take the series to the next level of realism. In FIFA 21, players will be able to play as any player and team in the past, present and future, and they will be able to play with new AI opponents. For the first time ever, the gameplay in FIFA 21 will include an every-player-is-a-star attribute and players will be able to show-off their skills in the ability to play FIFA 21 like a pro, bringing a new level of authenticity and emotion to the game. Also new in FIFA 21, the Career Mode will be more accessible than ever before with smarter advisors, more in-depth stats, quicker creation and more customisation options. So, if you want to play FIFA like a pro, you'll need to decide who to select before you step on the pitch, but what about those who are new to the series? We've got an easy way for you to jump in! FIFA Gameplay FIFA 20 is the spiritual successor to FIFA 19 and brings the game to the next level of gameplay and realism. The steps taken to get the game to the standards that football fans demand will have a major impact on the gameplay. FIFA 20 sets new standards for what you can expect from a
